Organization and planning of event concepts furthermore their support and realization.

Working student

2017 - 2019

University of Potsdam - Institute for Political Philosophy and Philosophical Anthropology

Supporting research lectures and presentations as well as organizational Tasks.

Student

Philosophy/History

As a philosophy and history student, I have developed strong analytical and logical thinking skills, as well as a deep appreciation for the complexity and diversity of human cultures and societies. My studies have taught me to approach problems and questions from multiple perspectives, to think about the long-term consequences of different actions and decisions, and to communicate effectively and persuasively.

Web Development

I recently completed a one year intensive course in web development, where I had the opportunity to learn a broad range of frontend and backend technologies. Through a combination of lectures, hands-on projects, and group work, I gained a strong foundation in web development principles and practices.
